

Entech Group

ENGINEERING AND PRODUCT DESIGN

For more than 10 years we are providing plastic product design, prototyping, injection mold design and manufacturing, as well as injection molding of plastic parts, vacuum forming services.

We are especially proud and appreciate our highly skilled employees who have many years of experience in plastic product design and production, project management.

PRODUCT OF A YEAR
2013

PLASTIC PRODUCT DESIGN

- ▶ Drawings and sketches
- ▶ Plastic parts design
- ▶ Product body design
- ▶ Outsourcing of engineers
- ▶ Selection of materials
- ▶ Three-dimensional modeling (3D)

PRODUCT BODY DESIGN

- ▶ 3D modeling
- ▶ Sketches
- ▶ Concept development
- ▶ Consulting
- ▶ Product design
- ▶ Visualizations

Entech Group

CUSTOM MADE PLASTIC PARTS AND MASS PRODUCTION

We manufacture a variety of plastic parts according to individual orders. We call ourselves professionals and leaders in this field in Lithuania. We can produce parts from very small (or less than 1 gram) molded plastic parts and vacuum-formed large banner stands. Our experience and expertise allows us to offer You only the highest quality products and service.

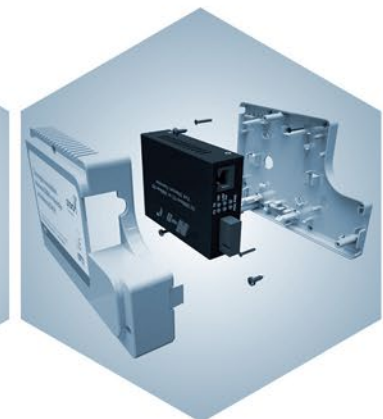

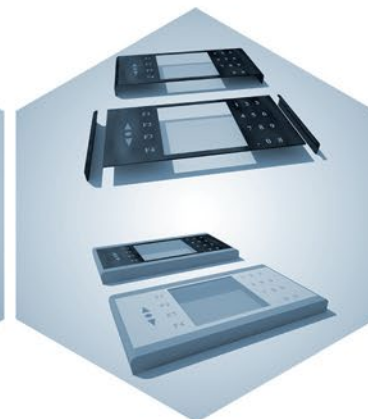

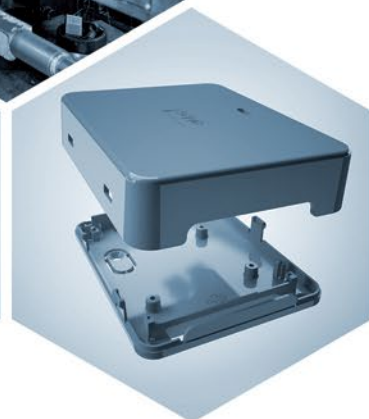

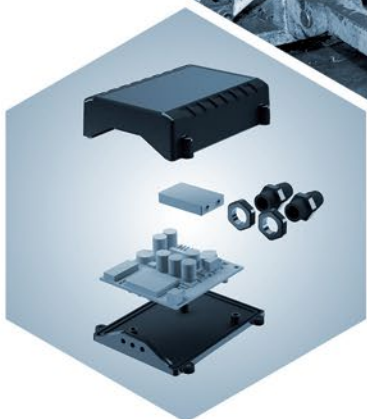

PLASTIC MOLDING AND VACUUM FORMING

- ▶ Custom plastic parts
- ▶ Plastic car parts
- ▶ Plastic cases for electronic products
- ▶ Plastic containers for food and non-food products
- ▶ Vacuum formed plastic parts

PROTOTYPING AND SINGLE PRODUCTS

- ▶ 3D printing and modeling
- ▶ Plastic milling, stamping, grinding
- ▶ Prototyping of plastic parts
- ▶ Production of promotional letters
- ▶ Single custom parts

Entech Group

DESIGN AND PRODUCTION OF INJECTION MOLDS

Design and manufacturing of molds. Years of experience and a considerable list of partners allows us to offer You the shortest terms and the highest quality at a reasonable price. We represent prototyping companies from Europe and Asia. Prototype production time depends on the details and the complexity of the chosen method of manufacture, quantity and budget for the project, and can range from a few days to a few weeks.

MOLD DESIGN

- › Coordination of drawings
- › Mold design assessment
- › Mold design
- › Plastic material filling analysis

PRODUCTION OF MOLDS

- › Molds for mass-production
- › Mold production control
- › Reception and care
- › Single-use injection mold manufacturing
